# GOOD NEWS STORIES

## The Dog That Saves Orcas!

Eba, an adopted mixed breed dog, has joined part of a research program to save killer whales. What is his role? To sniff and locate the feces of this endangered species.

Orcas are endangered. According to a study published in the journal Science, half of the species will become extinct within 30 or 40 years. Pollution, more specifically PCBs, is once again responsible. Also known as polychlorinated biphenyls, these harmful materials are used in plastic, paint or oil, and are found in the oceans. Their toxicity first reaches killer whales. This is because these large predators consume fish whose organisms contain PCBs. Therefore, "even in healthy oceans, killer whales reproduce very slowly. Healthy killer whales need 20 years to reach sexual maturity and 18 months to bear a calf ", says Paul Jepson of the Zoological Society of London. As a result, the species is becoming rare, appearing only in the Nordic Seas, towards Iceland and Norway, as well as in Canada.

Off Canada, only 74 southern killer whales remain. To address the urgency of the situation, researchers are using a novel technique. Since 2019, Eba has been accompanying scientists in the field to collect the feces of the species to be protected. This mixed breed dog was adopted by the marine biologist specialized in killer whales, Déborah Giles, after she found it abandoned. Although she did not plan to incorporate it into the Canine Conservation Program, she changed her mind about its traits. Eba is playful and very dynamic, which gave her detection skills that were useful to biologists at the time. The Centre for Biological Conservation's program, which he joined a year earlier, trains shelter dogs to detect wildlife feces and marine wildlife.

*Loving God,  
give me a listening heart, so I  
can listen with wisdom and  
without rushing into judgment.  
Help me see the person before  
me, not the label others give  
him/her/them. Give me an  
open heart and an open mind  
to appreciate other peoples'  
journeys and perspectives.  
Amen.*

If you need support there are many at Assumption who care:

Mr. McDougall, Principal

Mr. Laurin, Vice-Principal

Ms. Thomas, Vice Principal

Ms. Rerecich, Chaplain

Ms. Misener, CYC
