Description

This course emphasizes the consolidation of the language, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyse a range of challenging literary texts from various periods, countries, and cultures; informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended for preparing students for university, college, or the workplace. Students intending moving from one destination to another (e.g., college to university or workplace to college) must successfully complete a transfer process.
